## *experience*

### **UI Developer**

*LEVEL Studios - San Jose, California { 11.2009 - Present }*

- Work closely with team members to build dynamic user experiences.
- Translate design comps into standards-based, SEO-friendly HTML and CSS code.
- Develop templates and front-end components for various content management systems and social media frameworks.
- Perform maintenance and content publishing tasks to keep client sites current.

### **UI Designer & Front-end Developer**

*Nolo - Berkeley, California { 02.2009 - 11.2009 }*

- Reviewed design specifications for new site launch and proposed tweaks necessary to accommodate launch features and desired user experience.
- Collaborated with various departments to achieve business goals by creating consistent visual design.
- Prototyped design solutions and potential use cases.
- Other duties included copy editing, copywriting, and writing documentation.

### **Web Production Artist**

*Shmoop University, Inc - Mountain View, California { 08.2008 - 12.2008 }*

- Oscillated between Marketing and Engineering teams.
- Variety of production work, including: HTML email blasts, copy editing, cross browser validation, creation of assets from static pages to specific page elements, and batch production.

### **Web Developer**

*Washington University in St. Louis - St. Louis, Missouri { 10.2004 - 06.2006 }*

- Worked with team to design, code, and develop sites.
- Used design software to build and code static and dynamic pages from mock-ups.
- Worked on multiple projects at once, with emphasis on cross browser testing and standards validation.
